Oakburn Early Years Centre is being built on the site of the former St. Joseph's Primary as part of the Council's commitment to deliver on the Scottish Government's requirement for additional hours of early learning and childcare.

### Construction Progress:

As we go into week 47 of the project, I would like to give you all an update on the progress at Oakburn Early Years Centre. Since our last letter we have completed the steelwork, roof sections and the timber kit. The interior fit out has progressed with partition works completed and both mechanical and electrical works starting with decoration underway. External road works have commenced, and the timber cladding is ongoing.

Works out with the site boundary will commence in the coming weeks and we will ensure that we give you more information closer to the time.

### Community Activity:

Robertson are registered partners in the Considerate Constructors Scheme and await a site visit which will evaluate our integration within the local community. Robertson have employed local resources to aid with construction of the project and have also engaged with local schools as we look to provide further assistance within the local community as part of the Community Benefits Scheme. The site is monitored by remote security cameras covering the full site.
